

Electrical Estimator – Competitive Salary + Benefits – Sidney, OH (45365)

The Role

We are looking for a highly motivated and sharp Electrical Estimator to join our team and take our projects to the next level!

We are looking to hire an experienced electrical estimator to determine the approximate costs of various electrical installations for industrial and commercial projects. The ideal candidate should have experience and knowledge of electrical codes, be detail-oriented, and have excellent analytical and problem-solving skills. You should also be proficient in reading building plans and have a knack for cutting costs and reducing inconsistencies between estimated and actual project costs.

Key Responsibilities:

The key responsibilities of an Electrical Estimator include, but are not limited to:

- **Assist** Estimating Team with timely roll-out and execution of the entire estimate deliverable process.
- Conduct initial analysis of drawings and specifications to ensure required documentation is present and determine scope of work.
- Develop full-scope estimates based on Bid-Build, Design-Build or CM/GC construction documents.
- Critically analyze bid documents and understand risk and opportunities and articulate those to management.
- Organize the bid team, providing leadership and direction with regards to means and methods, schedule and strategy.
- Create detailed crew and production cost estimates and review prices with estimating team.
- Solicits and analyzes subcontractor and vendor pricing input when required.
- Attends project site pre-bid meetings, site tours, and post-bid interviews as required.
- Develops unit costs accurately.
- Performs technical/plan review when required.
- Gather and monitor actual cost vs. estimated cost, maintaining project cost history/
- Manage and maintain subcontractor database and subcontractor prequalification.
- Builds effective relationships with customers, design team, subcontractors, suppliers, and user groups.

The Company

Since it was founded more than six decades ago, Sidney Electric has gone through a transformation and now provides comprehensive services in electrical, mechanical, and technological systems. We serve customers from both Ohio and Indiana, offering design, construction, and maintenance services.

The Benefits

- Health, dental, vision plan
- Paid vacations and holidays.
- Life Insurance
- Profit sharing plans
- Incentive and recognition programs.

The Person

The key skills and qualities of an Electrical Estimator are:

- Completion of a postsecondary education electrician training program.
- Bachelor's degree in construction science, engineering, construction management, or related field experience is advantageous.
- 5+ years of preconstruction/estimating and/or operations experience on commercial construction projects.
- Certification through the American Society of Professional Estimators (ASPE) or the Association for the Advancement of Cost Engineering (AACE) International is advantageous.
- Experience estimating/managing industrial/commercial projects up to \$1M in size
- Experience with Microsoft Office products and estimating program Accubid.
- The ability to interpret blueprints.
- Strong analytical and problem-solving skills.
- Excellent organizational skills.
- Effective communication skills.
- Exceptional customer service skills.
- Highly motivated to take advantage of and seek out opportunities to learn.

If you have the drive to succeed, a love of electrical engineering, and a passion for numbers, then this job is for you. So, if you're ready to put your skills to work and make a difference, we'd love to hear from you. Apply today and let's get the sparks flying!
